A MESSAGE FROM THE CEO

It's a pleasure to welcome you to KH Energy's official website!

After entering the petroleum business in 1961 as KongHang Petroleum Trading Company, we became the first among distributors to sell 5 million drums of petroleum products and record KRW 1 trillion in sales. We have constantly innovated and developed ourselves by playing a leading role as a distributor of petroleum products and LPG.

The rapid evolution of the market is now challenging us to seek for change and deliver corporate value for the future.

At KH Energy, we are preparing to take another leap forward as a comprehensive energy-related corporation leveraging on our culture and experience that have been accumulated during the past half century. At the same time, utmost efforts are being made to penetrate into future global markets by expanding our business scope to include expressway rest and service areas, environment/IT businesses and other new energy-related fields.

We also take interest in the local community, sports and culture in order to fulfill our role as a socially responsible corporation, all of which are a part of our effort to become a people-oriented company where our employees at KH Energy are respected by the society.

KH Energy aspires to become a corporation loved by our customers. To this end, we will relentlessly hone our capabilities and services to meet your expectations. We appreciate and welcome your continued interest and support.

Thank you.

CEO Song chin-soo

INTRODUCTION OF DEPARTMENTS

We seek to take another leap forward as a comprehensive energy-related corporation leveraging on our culture and experience that have been accumulated during the past half century. At the same time, utmost efforts are being made to penetrate into future global markets by expanding our business scope to include expressway rest and service areas, other new energy-related fields as well as the IT sector.

PETROLEUM

The department consists of a sales division located at the headquarters as well as 4 regional divisions. The sales division at the headquarters is in charge of planning major policies and supporting sales of the overall petroleum business and regional divisions are responsible for supporting local logistics centers, gas stations and charging stations located in their respective areas.

REST & SERVICE AREA

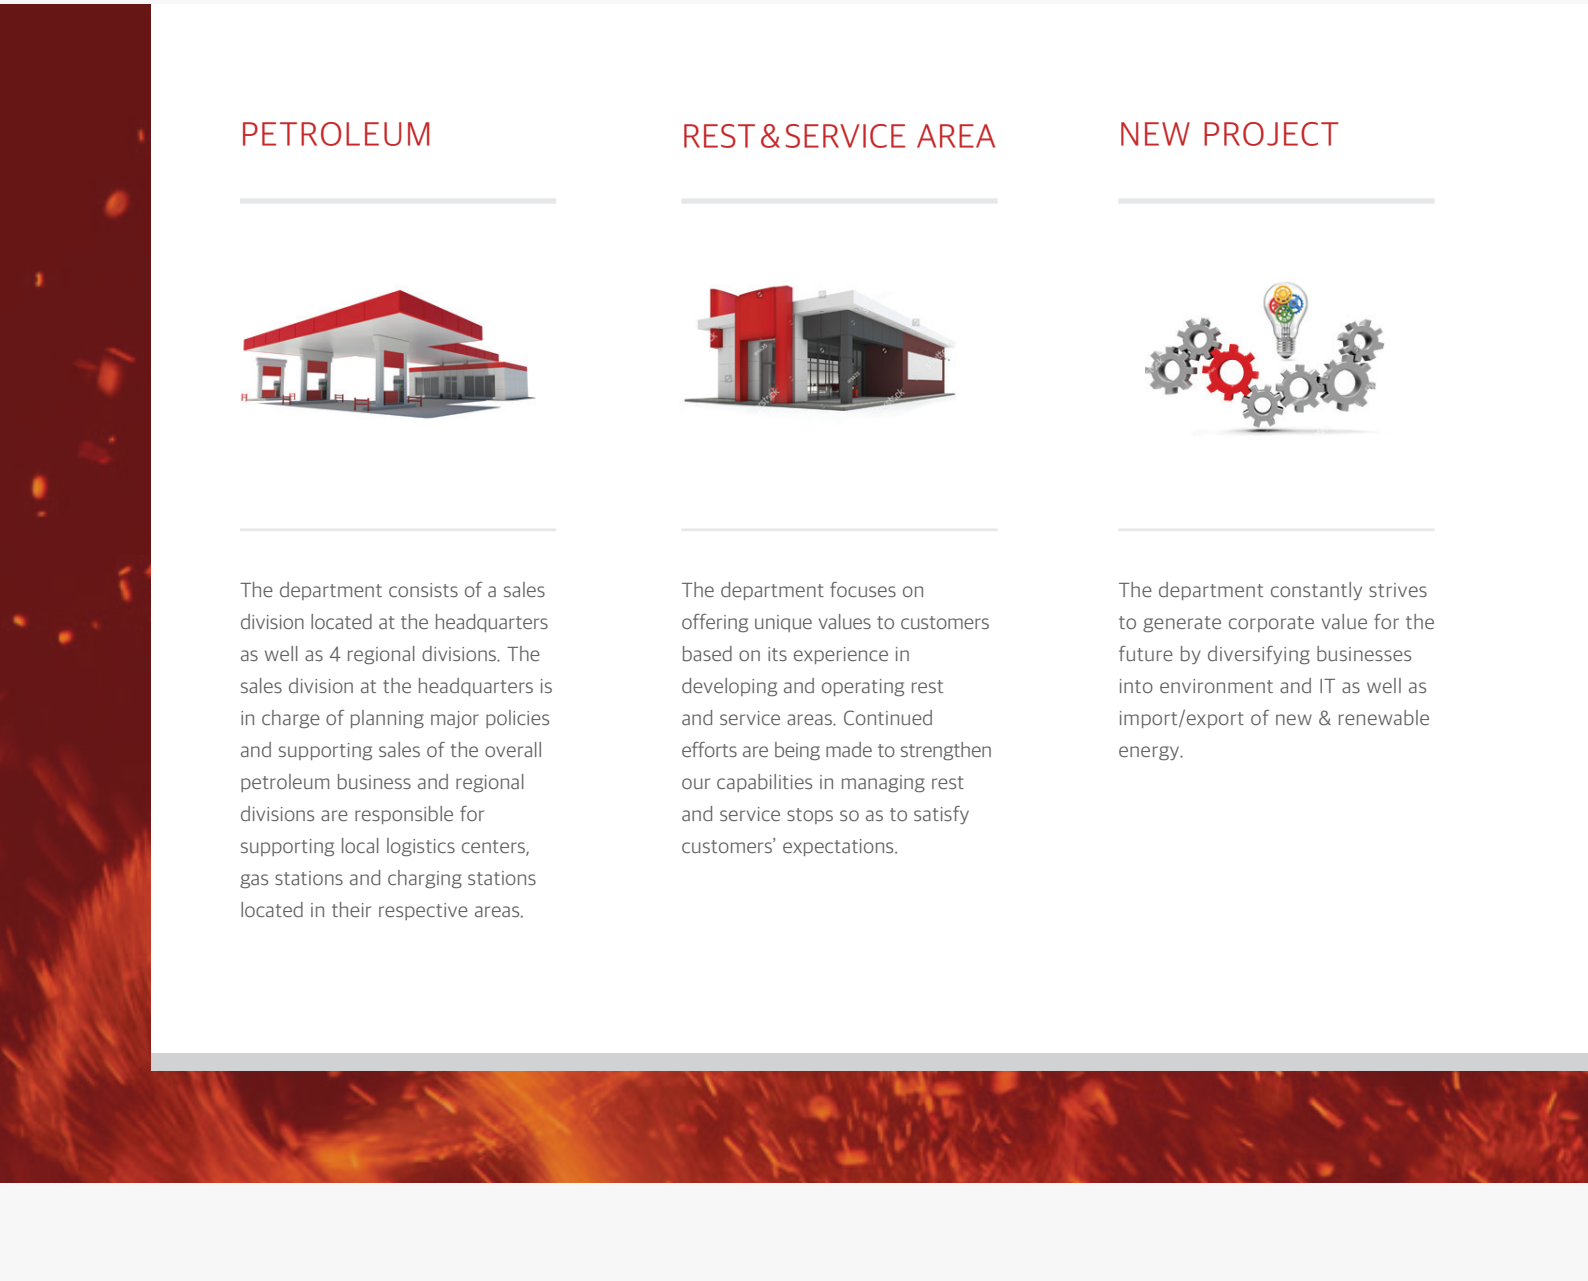

The department focuses on offering unique values to customers based on its experience in developing and operating rest and service areas. Continued efforts are being made to strengthen our capabilities in managing rest and service stops so as to satisfy customers' expectations.

NEW PROJECT

The department constantly strives to generate corporate value for the future by diversifying businesses into environment and IT as well as import/export of new & renewable energy.

OUR BUSINESS

BUSINESS SCOPE

After entering the petroleum business in 1961 as KongHang Petroleum Trading Company, we became the first among distributors to sell 5 million drums of petroleum products and record KRW 1 trillion in sales. We have succeeded in retaining our leadership as a distributor of petroleum products and LPG, and continue to strive to become a comprehensive energy company by diversifying our business scope to include rest and service area, logistics and IT/environment fields.

PETROLEUM

Wholesale of commercial fuel and propane/
Operation of gas stations and charging stations

REST & SERVICE AREA

Operation of expressway rest and service areas

LOGISTICS

Storage and transportation of commercial fuel and LPG

NEW PROJECT

Expansion into new and renewable energy, environment/IT and overseas projects

PETROLEUM / REST & SERVICE AREAS

PETROLEUM

Wholesale

Commercial fuel, LPG, diesel exhaust fluid and lubricant are supplied to not only gas stations and industries but also general retailers all over the country through our nationwide network of logistics centers and oil storage facilities.

Retail

We currently manage company-operated gas stations and LPG charging stations located all over the country. Based on our operating skills accumulated during the past half century, we have established an extensive network that allows customers to easily access our business sites wherever they are.

REST & SERVICE AREAS

We operate rest and service stops that offer both drivers and vehicles the most comfortable resting place on the road in the form of direct management and consignment. An optimal resting area tailored to travellers' needs is formed to ensure a safe driving experience.

LOGISTICS / NEW PROJECTS

LOGISTICS

Storage

We can deliver a stable supply of our products at all times thanks to our tank terminals and logistics centers located in major areas.

Transportation

We are equipped with an optimal system that enables us to transport products to major areas across the country in a timely manner.

NEW PROJECTS

New projects

We pursue diversification by venturing into new future businesses (e.g. export/import of new and renewable energy, environment, IT).

Environment

We are committed to creating a healthy and pleasant environment. We seek to nurture new cultural values for indoor environment by offering a comprehensive solution on poor air quality.

IT

We supply key components for multimedia wireless communication terminals/systems and develop specialized solutions for IoT, smart homes and health.

PETROCHEMICAL PRODUCTS

INTRODUCTION OF PRODUCT

You can rely on KH Energy to provide SK Energy's world-class quality products.

PREMIUM GASOLINE

Premium gasoline fuels passenger cars equipped with a gasoline engine. Compared to regular gasoline, engine protection and acceleration are drastically enhanced.

GASOLINE

Gasoline fuels passenger cars and SUVs (RVs) equipped with a gasoline engine. With the addition of world-class additives, the engine is kept clean and drivers are able to enjoy a smooth, quiet and comfortable ride.

PREMIUM DIESEL

Diesel fuels passenger cars and SUVs (RVs) equipped with a diesel engine as well as industrial/household boilers. Through complete combustion, users will experience reduced noise, better fuel economy and enhanced power.

KEROSENE

Kerosene fuels boilers for households, industries and buildings. No foreign substances are created and excellent combustion is available through a highly advanced refining process.

HEAVY FUEL OIL

Heavy fuel oil is used for internal-combustion engines for ships, etc., large-sized boilers, industries related to ceramics, metal refining, etc. Bunker A, bunker B and bunker-C oil are collectively called as heavy fuel oil or fuel oil, and is characterized by its relatively lower price and higher calorific value.

LPG

LPG, or Liquefied Petroleum Gas, can be divided into butane and propane. Butane is mostly used to fuel passenger cars and portable gas stoves, and propane is a clean fuel used in various places including households, apartment complex, restaurants and industries.

CUSTOMER SUPPORT / PR

SOCIAL CONTRIBUTION

KH Energy engages in various social contribution activities in the fields of social welfare, local community, culture/sports and many others in order to exercise the spirit of sharing and plant a seed of hope for future generations.

SOCIAL WELFARE

Regular sponsor of Okedongmu Children in Korea / Book donation with SK Energy

LOCAL COMMUNITY

Sponsoring local sponsorship programs / Sponsoring homeschool materials for children / Operating "Hope" classrooms to tutor under-privileged children

CULTURAL SPORTS

Sponsoring Korea Handball Federation / Sponsoring Korea Senior Baduk

CAREERS

WHAT WE VALUE

AUTONOMOUS INDIVIDUALS

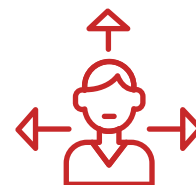

We welcome talented individuals who are passionate and enjoy working in an autonomous atmosphere.

DIFFERENTIATED INDIVIDUALS

We welcome talented individuals who bring in their personality while smoothly communicating with others in a harmonious manner.

CREATIVE INDIVIDUALS

We welcome talented individuals who motivate change through creative imagination and sense.

EMPLOYEE WELFARE BENEFITS

KH Energy is looking for talented individuals who are prepared to lead the global future together.

HOUSING SUPPORT

Accommodations for employees working at regional sites
